CORE Create a **resume repo** with name resume file readme.MD. Now copy the code from resume template . Now update this with your own information. Commit it and push this to master branch.

### Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?  
[Import a repository.](#)

Mohammed Eid

Software, Network and DevOps engineer, Cloud architect.  
m7md3id.10@gmail.com

Currently

Student, Learning DevOps at Coding Dojo

Specialized in

AWS Cloud, Linux, AWS cloud & services, SDLC, Iac, git, ansible.

Education

King Abdulaziz University

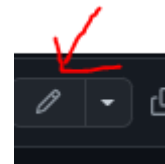

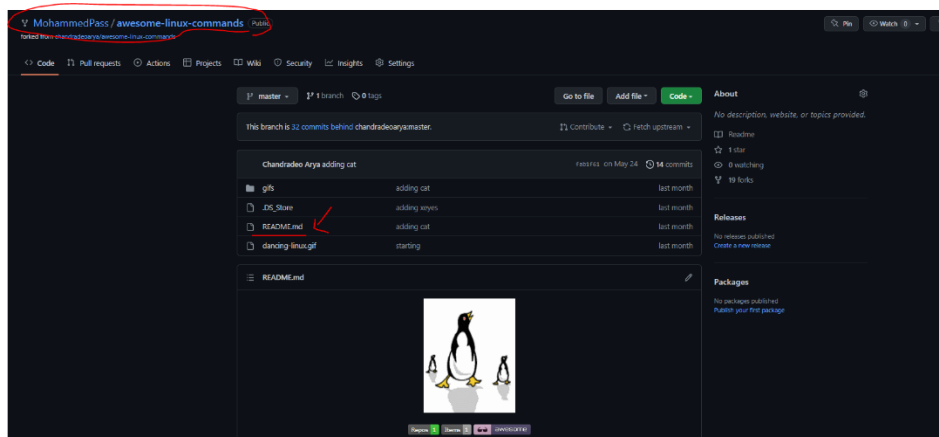

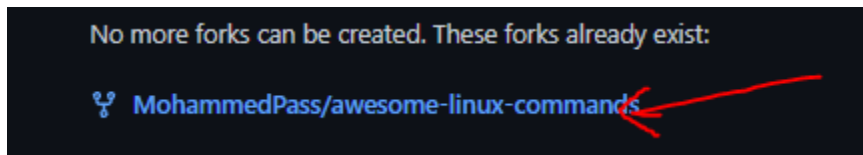

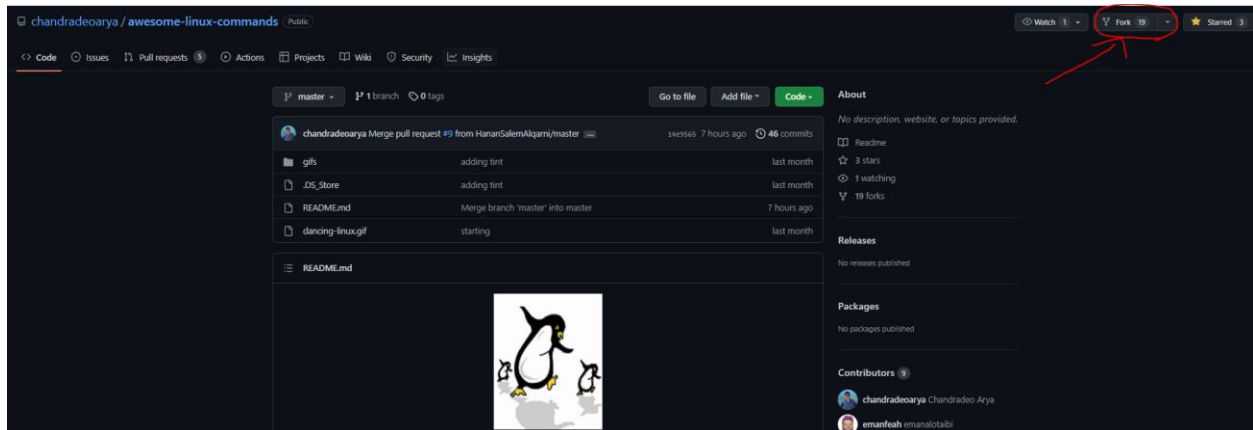

Awards

First place in an information competition at the university level, 3rd place in the e-commerce hackathon, First Champion of the Week in DevOps Camp, week 1

Projects

Improving the academic accreditation system for the college provided by ABET, Build a program to encrypt and decrypt all computer files

CORE Fork repo <https://github.com/chandradeoarya/awesome-linux-commands> and now add your name in the list of contributors. Now create pull request to the source repo.

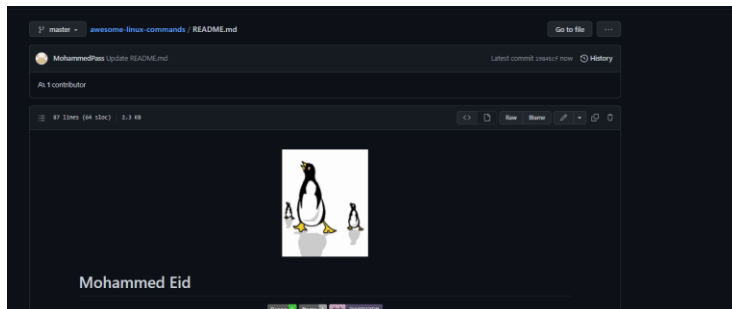

The screenshot shows a VS Code editor window titled "awesome-linux-commands / README.md | in master". The editor has tabs for "Edit file" and "Preview". The code in the file is as follows:

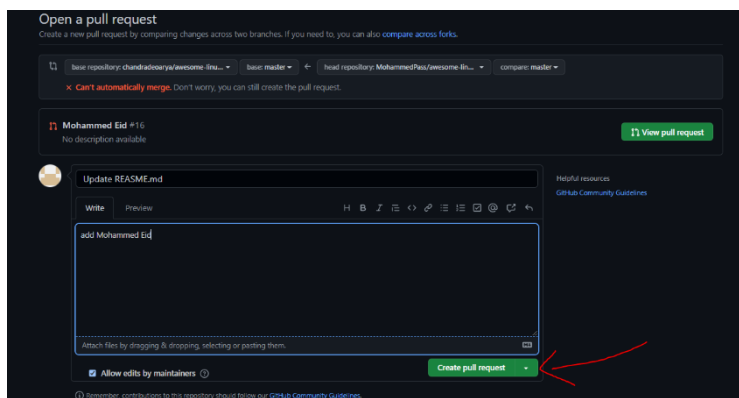

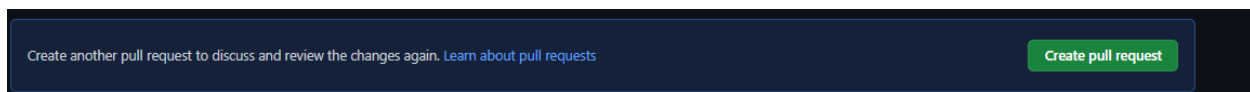

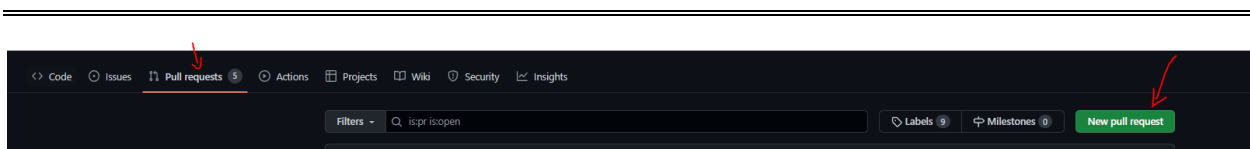

```

1 <p align="center">
2 
3 </p>
4
5 <u><a href="mailto:chidmohamed.fid@hiq">chidmohamed.fid@hiq</a></u>
6
7 <p align="center">
